

Is a joke. You can never speak to same
Person not even the person the help write
Your plan.
If you ring up and ask same question, I have
Done this you will get different answers every-time.
How can that be where is the system
this should be based on.

Their are people in this Country struggling
more than the average person.
Their disability and illness stops us from
Ever really having any type of normal life.
Families reject us, people abuse and use us
Physically emotionally mentally and financially.
I have had to watch my whole life took
a very long time for the disabled to have
an rights. ie not to be maltreated or abuse to
seek employment now.
To be able to read our own medical records
But unfortunately disabled people are still
Not cared for correctly.

I'm so glad you are asking participants
to add their own comments, but unfortunately
many can not on their own.

I believe as a solution all participants of NDIS
have more rights, more control over how money
Is really used to help the whole person
achieve what ever they want to at any age.
So far all that is happening you are giving large
Budgets to very greedy coordinators
to decide with barely any knowledge of
The person or any medical qualifications to make
Decisions about their future.

I do hope Mr Shorten you do take the
time personally to read all letters and information
given you and take on board the struggle
many many people are going through
Every minute of everyday.

Being disabled and always in chronic
Serve pain 24/7 we need help.

I'm nearly at the point of cancelling my NDIS
It doesn't really help me the way I need
It just creates a illusion of help.
Also creates endless stress we have
To deal with as well.

As well as some invoices NDIS won't pay now
(Which use to be paid same suppliers and provide
This has left me in thousand of dollars debt
Thank you for that!!!!!!!

Please feel free to contact me
If you require any further information.
